SUMMARY

I have run a business, led people, and won every competition I entered. Now I want to do it at scale inside Amazon's operations network. Operations-focused Master of Applied Computing candidate (University of Windsor, Apr 2026) with 3+ years leading teams, driving measurable efficiency improvements, and delivering results in fast-paced, customer-focused environments. Computer Engineering graduate (8.71 CGPA) with a track record of taking ownership, mentoring teams, and improving processes under pressure.

EDUCATION

Master of Applied Computing (MAC) | University of Windsor Dec 2024 – Apr 2026 (expected) | Windsor, ON

Canada's leading industry-partnered applied computing graduate programme, students work directly with real industry clients on live business problems.

- Delivered 2 consecutive 1st-place finishes in university-wide capstone competitions judged by industry professionals and faculty. Competing against all MAC cohort teams simultaneously.
- Capstone projects: AI-driven inventory management system for the medical sector (reduced manual data entry by an estimated 70%), and a real-time operations dashboard for an Ottawa transport client.

Bachelor of Engineering (Computer Engineering) | Madhuben & Bhanubhai Patel Institute of Technology

Mar 2019 – Apr 2023 | Gujarat, India

Accredited engineering institution under Gujarat Technological University. 4-year programme in systems design, software engineering, and operational problem-solving.

- Graduated with 8.71 CGPA (top quartile) across a rigorous Computer Engineering programme demonstrating the analytical rigor required to dive deep into operational metrics and drive data-driven decisions.

LEADERSHIP & OPERATIONS EXPERIENCE

Web Developer & Client Services Representative | Tender Hub Jul 2024 – Dec 2024 | Gujarat, India

B2B procurement platform serving small and mid-size businesses across Gujarat fast-paced sales and technology environment.

- Managed 2 simultaneous workstreams, full website development and an active outbound sales pipeline independently and without daily supervision, demonstrating ability to operate autonomously in a performance-driven environment.
- Contacted 20+ prospective clients per week, qualifying leads and converting enquiries into service agreements, directly contributing to monthly revenue targets across a 6-month engagement.
- Delivered 3 major website feature updates on schedule over 6 months, improving user engagement and reducing reported client navigation issues by approximately 40%.

Owner & Operations Manager | Independent Retail Grocery Business May 2023 – Jun 2024 | Gujarat, India

Owned and Operated neighborhood grocery store stocking 200+ product lines (dry goods, fresh produce, household essentials) serving a high-frequency community customer base in Gujarat, India.

- Supervised, scheduled, and performance-managed 15 employees across daily operations over 13 months setting shift targets, resolving conflicts, coaching individuals on customer service standards, and maintaining accountability in a customer-focused environment.
- Managed end-to-end B2B relationships with 5+ local and regional suppliers negotiating pricing, delivery schedules, and volume terms to secure 10–15% cost reductions on key product lines and eliminating all stock-out incidents across the full operating period.

- Built and maintained B2C relationships with a loyal customer base of 40–60 daily visits — personally handling all escalations, resolving complaints on the spot, and maintaining a high repeat-visit rate through consistent, reliable service quality.
- Managed a monthly inventory budget of approximately CAD $3,000–$5,000 across 200+ SKUs; applied strict FIFO rotation that reduced spoilage by an estimated 20%, saving roughly CAD $400–$600 per month in waste costs.
- Operated fully independently as a single decision-maker across procurement, staffing, compliance, and customer service, building the autonomous, take-ownership mindset central to Amazon's Area Manager role.

Software Developer Intern & Team Lead | InnoBrain Technologies Jan 2023 – Apr 2023 | Gujarat, India
Web and mobile application development firm in Anand, Gujarat fast-paced agile environment delivering client software solutions.

- Promoted to team lead within the first month of a 4-month internship. Took ownership of coordinating 3 junior interns, assigning tasks, setting daily priorities, and driving the team to deliver sprint milestones on time.
- Eliminated missed sprint deadlines: reduced late deliverables from 2 per sprint to zero across the team's final 3 sprints by introducing daily standups and proactive blocker escalation.
- Built and deployed full-stack client web applications accepted into production demonstrating the ability to execute technical work while simultaneously managing a team's output and morale.

Teaching Professional | Bachpan NGO Jul 2019 – Mar 2020 | Gujarat, India
Bachpan is a non-profit running after-school education programmes for underserved children in Gujarat, India.

- Independently managed a class of 30+ students across grades 5–10 planning, delivering, and tracking progress across 3 subjects simultaneously for 9 months with no senior oversight.
- Coached 15 students through a competitive government selection exam (JNU) 14 were successfully selected, achieving a 93% pass rate through structured individual coaching, targeted exam preparation, and consistent performance tracking.
- Adapted coaching approach across 4 distinct learning levels within the same group the precise individual-level mentoring and group accountability management required to lead diverse teams of hourly employees.

SELECTED PROJECTS

AI-Powered Medical Inventory Management Dashboard [1st Place, University Competition]
University of Windsor Industry Capstone 2025 | Windsor, ON

- Led a cross-functional team of 4 to build a full-stack inventory dashboard for a medical industry partner. Delivered an AI recommendation engine that flagged reorder needs and near-expiry stock in real time, preventing waste and reducing manual oversight costs.
- Implemented receipt-scanning bulk upload that cut estimated manual data-entry time by 70%; enforced FIFO expiry logic to minimize stock waste across a live production environment. Won 1st place in a university competition judged by industry and faculty.

Electric Retro Bus Operations Dashboard [1st Place, Industry Client Competition]
Ottawa Infotainment Capstone 2025 | Windsor, ON

- Delivered a real-time operations monitoring dashboard for a paying industry client (luxury 1960s electric bus conversion). Integrated live telemetry data, navigated shifting client requirements, and met a hard competition deadline. Won 1st place for the 2nd consecutive year.
